Online Backup Solutions for PCs, Laptops, Servers, Mac & Networks

The OnLine Pro range of disk-to-disk backup solutions delivers the simplest, most secure system of offsite data backup for PCs, laptops, Servers, Mac OS X and network environments.

Following a simple software download your data is automatically backed up each day to mirrored offsite data centres and is recoverable with a few clicks of a mouse.

If you are currently backing up your data to either a tape system or external hard drive call us to find out how we can improve the security of your data, streamline your backup processes and save you money too.

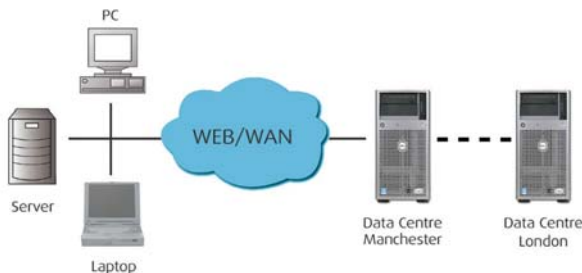

Protecting your data couldn't be simpler, or safer.

5 Steps to Secure Data Backup

1. Simple software download in which files for backup and daily backup time are selected
2. Data automatically compressed and encrypted for transmission
3. Data transmitted to secure offsite data centre for storage via your existing internet connection
4. Clunk Click then mirrors data automatically to second data centre
5. Lost data can be retrieved through the software directly to your machine with a few clicks of a mouse

Online Pro Desktop & Laptop

OnLine Pro D&L is a software-only solution for businesses that require simple, automated offsite backup and restore for stand alone PCs and laptops.

Clunk Click OnLine Pro Server Edition

OnLine Pro SE enables the management of more demanding network infrastructures and complex server environments.

The ability to run whilst logged off makes OnLine Pro Server ideal for unattended servers, whilst the variety of plug-ins available means that live databases and mail accounts are offered the protection they require, without disturbing the existing network layout.

OnLine Pro Server supports all major operating systems, including Windows, Novell, Linux and UNIX and most common live systems, including Microsoft SQL Server, Microsoft Exchange and Lotus Notes.

Online Pro D & L - Features & Benefits

- » 5 minute setup
- » Automatic daily backup to secure offsite data centres
- » Provides an audit trail of backups
- » Reduces downtime
- » Eliminates requirement for backup hardware
- » 24x7x365 data availability
- » Data restore with just a few clicks of a mouse
- » Fast incremental backups
- » Upgrade to any data capacity
- » Data compression & 448-bit Blowfish encryption

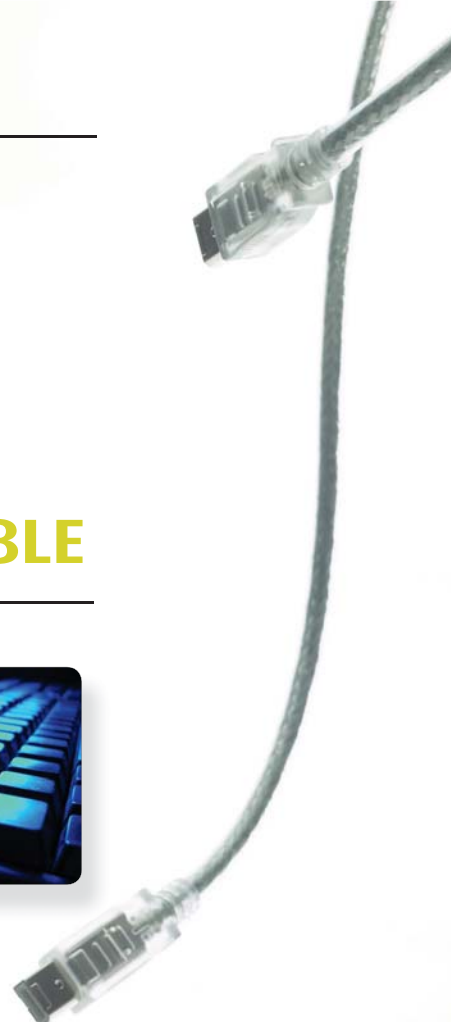

Online Pro SE Features

- » Works with most server configurations & network sizes
- » Supports multiple plug-ins
- » Mirrors onsite backup & restore systems
- » Multi OS support (Linux, UNIX, Solaris, Novell etc.)
- » Snapshot function - accommodates large data transfers
- » Backup Exchange Server & Backup SQL Server
- » Supports distributed Servers across multiple networks

Clunk Click - **ONSITE** Data Backup & Storage

SIMPLE, SCALEABLE, AFFORDABLE

Clunk Click is one of the UK's leading providers of secure data backup, restore and storage solutions.

Clunk Click **Onsite** Solutions offer the most secure, manageable and cost effective **onsite** data backup, restore and storage available. They provide an effective and efficient solution for the totally automated backup and recovery of critical information stored on a variety of platforms.

Clunk Click **Onsite** Solutions are ideal for single or multiple sites, for PCs, laptops, servers and networks, wherever they are. They deliver network efficiency, policy-based control and simplicity of use – minimising risk and maximising productivity.

*Our range of **onsite** solutions are ideal for businesses that prefer to manage their backups **onsite** but are wasting time and resources backing up to tape or other distributed backup systems.*

Our disk-to-disk solutions provide centralised management giving you total control of your backup procedures and the ability to recover data with just a few clicks of a mouse. We also offer the option of offsite mirroring for additional data protection.

Clunk Click Backup Solutions, whether **onsite** or online, are an essential element in any business continuity strategy. Should disaster strike Clunk Click will get your business up and running again – fast!

OnSite Solutions

for PCs, Laptops, Servers & Networks

Clunk Click OnSite Solutions comprise two key components, The Clunk Click Storage Platform and The Lighthouse Range which can also be combined with our online solutions to meet your exact requirements.

Our onsite solutions offer as standard an advanced administrative console, **The Backup Monitor**. This gives you live information on your backup status and activity. The Backup Monitor offers instant access monitoring, control and reporting to enable you to manage your backups as effectively as possible.

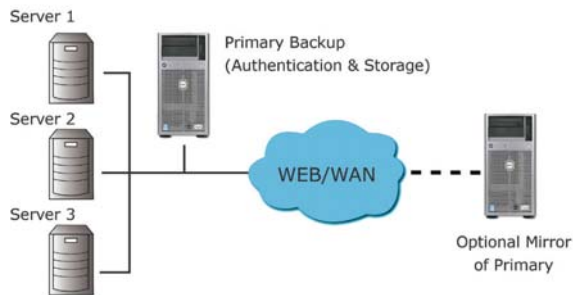

The Clunk Click Storage Platform

The Clunk Click Storage Platform is a software solution offering unlimited backup and storage capacity. Starting at 500GB the Storage Platform utilises either your existing hardware infrastructure or a system designed and installed by Clunk Click. The Storage Platform offers automated, secure disk-to-disk backup and recovery for servers, databases, PCs and laptops.

The Clunk Click Storage Platform minimises risk, maximises productivity and allows you to regain control of your most valuable asset – your data!

Clunk Click Onsite Backup Solutions

Single Site Scenario with Optional Remote Mirror

Optional Mirror may be hosted either by Clunk Click or at alternative customer location.

The Lighthouse Range

The Lighthouse Range has been designed for those who do not yet require enterprise-level deployment, although the solution is flexible enough to expand up to 2TB and grow with your business data needs.

With The Lighthouse Range, the Clunk Click software is bundled with one piece of dedicated hardware handling security, administration and storage, making it ideal for businesses that prefer to manage their data onsite but are using valuable time and resources backing up to tape systems.

RAID configurations, redundant power supplies and optional mirroring all provide the highest level of protection required from a backup solution.

Our Commitment To You - Total Flexibility

- » We help you to analyse your onsite backup and restore requirements
- » We work with you to propose the most cost-effective and technically efficient hardware and software solutions available
- » We build and install the system, and ensure it is working effectively
- » We provide any training or additional staffing resources required
- » We supply ongoing technical support and upgrades
- » 3 year onsite hardware warranty
- » Leasing option available

All Clunk Click products are compatible, so we can combine and customise them to match the precise needs of your organisation.
