

**Start Netviewer.
And let the
conversation begin.**

Sit down face to face with colleagues across the globe, without the travelling time
Streamline your business processes with more effective team collaboration
Share your screen and show exactly what you're talking about

**Online meetings –
anytime, anywhere.**

netviewer

Online meetings with Netviewer. Be wherever you want to be – at any time.

Here today. There tomorrow. And in between, project meetings with colleagues. That's what meetings today are all about. Thanks to Netviewer you can master these challenges without being stressed or pushed for time. Just arrange the meeting, start Netviewer, share your view via the internet – and the conversation can begin. It doesn't matter where the attendees are – in Paris, Shanghai, or in the office next door. With Netviewer, distances vanish into thin air. And people are brought together. Meetings couldn't be more effective.

Manage your projects with maximum efficiency.

Get project teams that are spread around the globe around a virtual table. Go through your proposals together. Set out the important milestones and exchange documents. That's how you get results. Quick and accessible for everyone.

Revise documents together in real time.

It's not easy to discuss written text over the phone. You have to be able to see it, annotate it, and revise it directly. With Netviewer you've got it all right in front of you – just like the people you're talking to. It's also quick and easy to involve independent experts in the decision making. Making the best use of all your resources.

Win new customers in a few clicks.

Netviewer is the fastest way to reach your customer. Simply open Netviewer, start your product demo and let your customer instantly see the advantages. To "Netview" means to ask, answer, show and explain. Just like a conversation in person. Only much faster, more targeted and more cost-effective.

Conduct training online.

Keep customers, partners and colleagues up to date. Show them what's new on the horizon. Whether it's innovations in technology or machine support and software training, with Netviewer you're always there for your customers.

Bring new developments to market faster.

3D models, design drawings, plans. It's always better to explain new developments in images. But how can you demonstrate the ideas to project partners if they are not sitting around the table? With Netviewer, of course. Quickly, directly.

Simplify your purchasing process.

Tell your suppliers what's what. Show them what you expect. With Netviewer you can discuss tenders, quotations, and delivery terms, even without meeting in person. Look your opposite number in the eye and lay your cards on the table. So that everyone can see them. Even if your supplier is in China, and you are sitting comfortably in your office. That's how business is conducted these days.

netviewer

Simply safe.
Simply irresistible.

Get started immediately.

No installation. No configuration. Just start the meeting and start talking. Communication without barriers.

As easy as 1-2-3.

The handling is simple and self-explanatory. You won't need any training. Being "online" has never been so easy.

Secure at all times.

A 3-tier approach to security. Encrypted data transmission with multiple certifications from independent institutions.

Tailored for you.

Customise it to your corporate design. Create your own user profiles. Over 75 configuration options.

Be there in a flash.

One click and you're at the meeting. Instant screen transmission, patent pending.

Internal or external operation.

Netviewer runs anywhere. On your own server, or on ours. It's completely up to you.

Free to grow.

Open interfaces. No limits to scalability. It grows to accommodate your needs.

Ready for meetings at all times – thanks to sophisticated functions.

Participant administration – systematic control of collaboration with meeting partners is in your hands. Transfer the remote control rights, change the viewing direction and much more – at the click of a mouse.

Pointer arrow – draw the attention of meeting participants to essential points with the pointer arrow. You'll get to the point much faster!

Select applications – specify which applications and documents you would like to share on your screen.

Monitor – have an overview of what's going on. Check what the person at the other end is seeing on your screen.

Whiteboard – sketch out your proposed solutions as you would on a flipchart. Use the different markers to highlight specific parts of the document.

VoIP-audio transmission – save on phone calls and transmit sound over the internet as well. Ideal for training and webinars.

Video transmission – Show your face! With the video function you can look your opposite number in the eye – live and in colour. Can be applied instantly without any installation.

Chat – allows questions from participants during a live presentation without interrupting the flow.

Scheduler – arrange appointments, invite participants and enter meetings directly into your Outlook or Lotus Notes calendar. Time management has never been so simple.

User administration – you can register users yourself and control centrally which functions of Netviewer are available to particular colleagues.

Profile manager – you can pre-define session settings for particular meeting scenarios. This way, your colleagues only use the functions they really need.

Session recording function – document your meetings and seminars, making them available for subsequent analysis.

File transfer – give participants fast, direct access to the relevant documents. Simply move them over – done.

Plug-ins – one-step integration of Netviewer into different standard applications. For example, start a meeting from within Word with a single click.
